

DELANCEY STREET FOUNDATION

The Delancey Screening Room is run as a training program of the Delancey Street Foundation. Founded in 1971, Delancey Street is considered to be the nation's leading self-help residential education community for former substance abusers and ex-convicts. All proceeds from the screening room provide direct services such as housing, clothing and food for the residents. Delancey provides academic education, vocational training, and training in interpersonal and personal skills at no cost to the taxpayer and no cost to the client.

Delancey Street is headed up by President and CEO Dr. Mimi Silbert. With Mimi the Delancey Street residents work towards learning not only the skills but also the values, the attitudes and the sense of responsibility they need to succeed in life drug and crime free.

Residents built this screening room and are proud and honored to present it to you. Please share in the future. Let us make your event the best it can be!
